ETRE OXYGEN

Vitalisation & More !

Oxygen activates the energy production in the cells. Enjoy vitalisation for body and mind.

The ETRE OXYGEN concentrator in its two varieties OXYGEN MED for medical services and OXYGEN COSMO for cosmetic applications is an important part of the ETRE THERAPYCONCEPTS.

How can you apply more Oxygen to the body?

Breathing it

- increased Oxygen concentration as an ‚oxygen shower‘ in wellness areas.
- direct breathing through a mask or a nasal inhalator. This variety is used in clinics, in wellness areas, oxygen bars and at home.

The Oxygen is produced by an ETRE OXYGEN concentrator through filtration of the air. This technology – made in Germany – is cost efficient and clean.

Dinking it

We supply OXYGENWATER-Systems for wellness professionals or for restaurants and hotels. Enrich your offer with an ETRE OXYGEN VITALITYBAR.

Massaging the skin with high pressure oxygen

In the ORIGINAL ETRE BIOLIFTING application, the facial skin is massaged with high pressure oxygen, leading to two effects:

- (1) higher concentration of Oxygen in the breathing air leads to an enrichment of oxygen in the blood
- (2) the skin is supplied better, in order to reduce wrinkles and regain natural beauty.

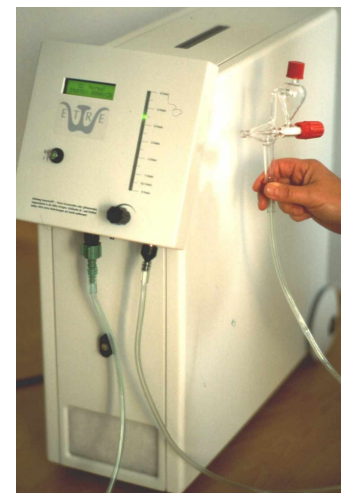

What are ETRE Oxygen treatments utilised for ?

Vitalisation, improvement of the oxygen supply, cancer prevention, in order to improve stability of patients with oxygen sensitive germs, for respiratory issues and as a support for people with a Burn-Out-Syndrom.

Professions which utilise ETRE OXYGEN concentrators

General practitioners, rehabilitation clinics, general hospitals, naturopath practices, wellness hotels, at home.

In the cosmetic sector as part of the Original ETRE BIOLIFTING application.
