## ETRE VITALRESONANCE

Cell Regeneration and Detoxification.

The ETRE concept therapy VITALRESONANCE is a combination of biofeedback, pulsating electromagnetic fields and a mind relaxation unit.

The component water

Before utilising the VITALRESONANCE device we recommend drinking a glass of water. Water acts as a solvent within the body and thus supports detoxification, as well as regenerative processes.

The component VITALRESONANCE

The most pleasant way to enjoy VITALRESONANCE is to lie comfortably upholstered on the optional handmade wooden bench, into which the device can be integrated. The pulsating electromagnetic signals, which equate to the body's own frequencies, will be transmitted for 10-15 minutes, depending on the desired effect. The basic effects which are generated by 19 of the 28 therapeutic programmes are ...

- ... stimulation of the cell metabolism
- ... improved circulation
- ... higher oxygen content in the blood
- ... soft detoxification and vitalisation.

Other effects depend on the selected programme. From a natural pain killing effect to specific therapeutic measures. The device can be used preventative to stay healthy, but also as therapeutic support.

The ETRE VITALRESONANCE unit is easy to operate. Several applicators match every desired way of utilisation. There is an applicator for the whole body, a small applicator for local treatments, an intensive applicator for acute problems, a head device for treating tinnitus ('ringing of the ears') and a stick applicator for therapeutic measures and dental application. A car adapter allows treatment while travelling.

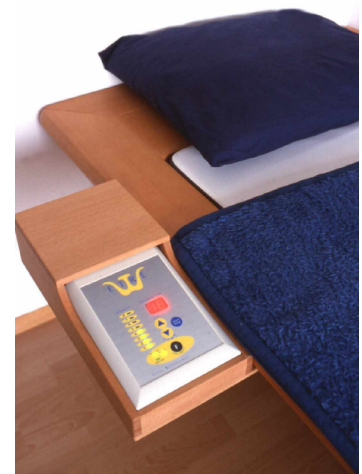

The components light and sound

The optional MENTALRELAX system relaxes by means of pulsed light flashes, which are emitted by special spectacles. To increase its efficiency, one can wear its headphones, too, which deliver matching tones. Furthermore it is possible to connect the VITALRESONANCE unit with a stereo sound-system to play relaxation music, synchronically.

Primary utilisation

As private or professional wellness application, for home therapy, in clinics, by naturopaths, homeopaths and medical practitioners.

As a pre-treatment for the ETRE BioLifting process.
